DETAILED ACTION

1. This communication is in response to the amendment filed on March 6, 2003. Amendments to the claims and the abstract made by the Applicant have been entered. Claims 65-95 are pending. As requested by the Applicant, claim 89 has been canceled. Claims 65-88 and 90-95 have been examined.

EXAMINER'S AMENDMENT/COMMENT

2. Figures 2 and 3 submitted by the Applicant are identical. Hence for publication, figure 3 is withdrawn by Examiner's amendment.

Allowable Subject Matter

3. Claims 65-88 and 90-95 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The claimed invention pertains to a closed loop loan processing system over a communication network from a remote interface including the step of automatic direct issuance of proceeds for the loan as requested by the loan applicant if the requested loan is approved and accepted by the loan applicant.

The closest prior art (Jones et al US Patent 5239462) in combination with Lockwood (US Patent 5576951) teaches all the features of the claimed invention except the step of closed loop loan processing where the proceeds of the loan are directly issued to the applicant without human intervention if the requested loan is approved and accepted by the loan applicant.

The searches separately made by the examiner and the Electronic Information Center on the databases of USPTO, European Patent Office, Japanese Patent Office, Derwent Database,

Art Unit: 3624

Non-Patent literature Databases do not show any patent or non-patent literature regarding ideas, projects or applications disclosed by the instant invention.

The following list identifies the most relevant prior art pertinent to the claimed invention:

Jones et al (US Patent 5239462) in combination with Lockwood (US Patent 5576951) teaches all the features of the claimed invention except the step of closed loop loan processing where the proceeds of the loan are directly issued to the applicant without human intervention if the requested loan is approved and accepted by the loan applicant.

Hasegawa, Naoto (JP 04363758 A) discloses a system for applying for bank financing to improve the process efficiency and reduce human error.

Instant Loan Approval System Now Available to Small and Mid-Sized Financial Institutions (American Management Systems Inc.) News Release, October 13, 1998 discloses a computer system that automatically checks a credit application for completion, obtains credit bureau information, credit scores the application, evaluates the gathered information using the institution's credit policy and renders the application ready for disposition by the loan officer. The proceeds of the loan or other disposal of the application are managed by the personnel of the Financial Institution.

Thus, the Examiner considers the novelty of the invention to be closed loop loan processing system providing loan processing over a communication network from at a remote interface including the step of automatically direct issuance of proceeds for the loan as requested by the loan applicant if the requested loan is approved and accepted by the loan applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
